2. WHAT IS THIS PRODUCT?

| | |
|-----------------------|---|
| Type | An actively managed Portfolio that uses exchange-based strategies (ICE, CME, etc.) and leverage. |
| Objectives | To achieve Portfolio growth by engaging in market arbitrage transactions and leveraging opportunities. Simultaneous execution of transactions for buying and selling the same asset on different trading platforms at times when the prices on these platforms differ. Markets: NYSE, NYSE Chicago, NSE of India, A Bolsa Do Brasil. |
| Target Clients | Clients (Investors), defined as Qualified Investors following Act No. 240/2013, who are prepared for high levels of risk and market volatility, and about whom it can be reasonably assumed that this investment corresponds to the Client's financial background, investment objectives, and expertise and experience in the field of investments, and the Client confirms these facts in writing. Minimum entry threshold – €125,000. Investment horizon – 3 years. |

3. WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The **Summary Risk Indicator (SRI)** helps compare the risk level of a given product with the risk levels of other products. It demonstrates the likelihood that the product will lose money due to market movements. The risk indicator assumes a 3-year investment horizon. The actual risk level may vary depending on the investment duration.

We have classified this product as 6 out of 7, indicating a high level of risk. Leverage significantly increases volatility and potential losses. The actual level of risk may vary considerably depending on market conditions and the holding period.

4. PERFORMANCE SCENARIOS

Example for an Investment of EUR 125,000 over 3 years.

| Survival Scenarios | | 1 year | 2 year | 3 year |
|----------------------------|-------------------------------------|----------|----------|----------|
| Stress Scenario (-20%) | What you might get back after costs | €94,080 | €72,310 | €55,580 |
| | Average return each year | -24.74% | -24.02% | -23.75% |
| Unfavorable Scenario (+5%) | What you might get back after costs | €121,540 | €123,015 | €124,500 |
| | Average return each year | -2.77% | -0.80% | -0.13% |
| Moderate Scenario (+20%) | What you might get back after costs | €135,115 | €155,010 | €177,830 |
| | Average return each year | 8.09% | 11.36% | 12.47% |
| Favorable Scenario (+38%) | What you might get back after costs | €146,845 | €186,880 | €237,840 |
| | Average return each year | 17.48% | 22.28% | 23.91% |

This table shows the money you could get back over the next 3 years, under different scenarios, assuming that you invest €125,000. The scenarios shown illustrate how your investment could perform. You can compare them with scenarios of other products.

The scenarios presented are estimates of future performance based on past evidence and are not exact indicators. What you get will vary depending on how the market performs and how long you keep the investment product.

The figures above include product-related costs (under certain assumptions) but exclude any possible taxes in your jurisdiction. You should be prepared for the potential partial or total loss of your investment. There are no guarantees of returns or capital protection.

5. WHAT HAPPENS IF THE COMPANY IS UNABLE TO PAY OUT?

Clients' assets are held separately from the Company's assets. In the event of insolvency or liquidation, the Portfolio will be distributed to Clients in proportion to their shares. There is no special insurance or guarantee scheme to cover losses.

6. THE IMPACT OF INVESTMENT-RELATED COSTS ON INCOME

The table shows how the different costs impact what you get back at the Recommended Investment (Holding) Period and what the different cost categories mean.

| Investment €125,000 | If you cash in after 1 year | If you cash in after 2 year | If you cash in after 3 year |
|------------------------|-----------------------------|-----------------------------|-----------------------------|
| Total costs | ~€14,885 | ~€21,800 | ~€29,450 |
| Impact on return (RIY) | ~11.91% | ~8.15% | ~7.12% |

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs include one-off, ongoing, and incidental costs.

7. WHAT ARE THE COSTS?

The table shows the impact of each year's different types of costs on the investment return you might get at the end of the Recommended Investment (Holding) Period.
